

Guess the next soccer world cup winner!

The success story continues: 25,000 installations require extension.

We're not resting on our laurels!

The MACS5-Compact replaces the successful MACS3: the same width and identical plugs allow easy replacement in the control cabinet, and all applications can- as they are backwards compatible - be adapted and continue to operate. Of course the MACS5-Compact is faster than the MACS3. With Ethernet, USB and optional EtherCAT, it has more interfaces, additional analogue inputs as well as an extra encoder.

With this development, zub is offering all MACS3 customers the connection to the further development of the zub control systems. This means that the systems can now be easily updated even after 19 years so that they can use the new features.

Guess the next world soccer champion and win a football

Who will win the next soccer World Cup?

Send your guess by **31 May 2018** at the latest by e-mail to kb@zub.ch and win one of three footballs.

If there are more than three correct answers, the earliest ones are decisive.

zub increases its development department

*Good, better, zub!
Work in the heart of Switzerland.*

We are seeking to recruit an [applications engineer](#) and a [development engineer](#) immediately or by agreement.

All further information can be found in the two PDFs.
