

Info Update: Motion Control Solutions

Everything included: Control unit + 6 amplifiers, each 1.5 kW peak

The MACS5-AMP2 combines a modern motion control unit with high power amplifiers in a compact housing. Each of the internal amplifiers offers 400 W continuous and 1500 W peak for direct control of powerful drives.

The MACS5-AMP2 is the economic solution to drive up to six brush-type or up to four brushless motors in the most dynamic and accurate way.

Have a good start!

After a brief summer break, the batteries are charged and the zub team is complete again.

We are pleased to support you in your project with our full drive power! Our aim is to provide you with an efficient consulting and engineering service.

Try us out!

The whole team wishes our customers a successful and great start!

Welcome to zub AG

We are interested in what is going on in your business. Especially when something goes wrong, we would like to hear about, understand, and help with your problems. Your challenge is also our challenge.

We would like to support you with new ideas, best-practice solutions, and a brain-storming session free of charge. We would like to hear from you and we will call you up from time to time. Always very open minded and always listening to your concerns.

Mrs. Huwyler is our new voice on the line. She would be pleased to stay in touch with you!
