

We get your projects moving!

12/2014

zub Engineering Services. A practical example:

A company is unable to upgrade its own positioning control system because the components are no longer available. It is not economically feasible to develop a new control system. On the other hand, existing systems have to be retrofitted or defective ones replaced. What to do?

[Read here](#) how zub AG - after a successful demo - was able to realize a complete solution **within just two weeks**.

zub AG at the sps ipc drives 2014

"This year the sps ipc drives again offered an ideal platform for exchange, brainstorming and ideas. This is where we lay the foundation for successful business relationships. Our trade fair innovation, the [Master-MACS](#) as well as the area of [Engineering Services](#) received a great response," according to Dieter Bieler, managing director of zub AG.

You missed the trade fair? [Call us](#). We will be glad to give you first-hand advice - by telephone or on a visit to your company.

New at zub AG: Welcome to the team!

We would like to extend a warm welcome to our new electrical engineer on the team, Mr. Martin Ambühl. Mr. Ambühl was previously working for the company Müller Martini Electronic AG, and has been reinforcing our team since November 2014.

"Our joint objectives are personal service and satisfied customers. By systematically monitoring the product quality I make an important contribution towards this. I look forward to talking to you and dealing with your problem."
